## PROFILE

Passionate front-end developer dedicated to building dynamic web apps and staying ahead of industry trends. Actively participates in exhibitions and conferences to expand expertise and innovation. Thrives in collaborative and problem-solving environments, contributing through open-source projects, knowledge sharing, and continuous learning to deliver high-quality work.

## WORK EXPERIENCE

- Atripa (Intelligent Travel System )** 2024 - PRESENT  
Front-End Developer
- Engineered an MDX blog project using Next.js and TypeScript, enhancing editor functionalities and fixing bugs. Optimized post creation and management for Persian content. [Demo/Github](#)
  - Developed and enhanced two responsive landing pages, implementing engaging motion effects using Framer Motion, resulting in a 30% improvement in user engagement and a more dynamic user experience. [Demo/Github](#)
  - Executed comprehensive manual end-to-end (E2E) testing, identifying and reporting 300 issues, ensuring a seamless user experience and faster bug resolution.
  - Accelerated development workflows by leveraging AI tools, generating optimized code, and improving problem-solving efficiency. Reduced development time by systematically integrating AI-powered automation.
  - Presented two software solutions at mashhad international exhibition, showcasing key features to potential clients and stakeholders, boosting product visibility and user interest.

## PROJECTS

- Dashboard** [Demo/Github](#)
- Built a responsive full-stack dashboard app with Next.js, TypeScript, TailwindCSS, and ShadCN, featuring Firebase authentication and CRUD functionalities powered by Firestore Database with pagination.
- Ecommerce** [Demo/Github](#)
- Using React Query for data fetching, Zod for validation, and Zustand for state management, implementing JWT token authentication and pagination.
