Dedicated Frontend Developer with 2 years of experience specializing in React and Next.js. Progressed rapidly from an internship to a core developer role within the Intelligent Travel Systems (ITS) sector. Proficient in transforming complex data into intuitive, responsive web applications using modern UI libraries including Material UI, Tailwind CSS, and Shadcn UI. Passionate about writing clean, maintainable code and delivering seamless user experiences.

Employment History

Front-End Developer

Atripa (Intelligent Travel System) (Mashhad)

Mar 2024 - Present

- Built and maintained the flagship Atripa web application, a comprehensive B2C flight and accommodation booking platform, utilizing React and Material UI.
- Integrated an AI-powered itinerary generator into the main booking site, seamlessly mapping personalized travel plans based on user preferences and improving user engagement.
- Architected and developed a scalable B2B travel service platform using Next.js, TypeScript, Tailwind CSS, and Shadcn UI, enabling smooth interactions for corporate travel partners.
- Engineered a robust internal Admin Panel using Next.js and TypeScript to efficiently manage booking data, user flows, and platform operations, leveraging Tailwind CSS and Shadcn UI for a clean, responsive administrative interface.
- Collaborated closely with backend developers and designers to ensure seamless API integrations and pixel-perfect UI implementations across all company products.
- Engineered an MDX blog project using Next.js and Typescript, enhancing editor functionalities. Optimized post creation and management for Persian content.
